

See home performance in action in this demonstration home! Tour it - Monday, April 7, 11:00 AM - 1:00 PM

Located in Shaler Township, in a neighborhood ten minutes outside the Pittsburgh city limits, this existing home is representative of tens of thousands of similar units built in the mid 1900's. It has been retrofitted

with state-of-the-art products and installation techniques to enhance energy savings, occupant comfort, health, and safety.

Insulation cannot do its job without proper air sealing. Air sealing prevents air movement within the insulation, thereby ensuring optimum performance. It also keeps the conditioned air inside the home.

Air sealing also enhances the durability of a home and improves indoor air quality by keeping unwanted moisture out of wall cavities and attics.

Visit www.homerevival.typepad.com to see photographs of the finished home and to read final reports that give facts and figures on the performance improvements achieved.

Cellulose insulation is a recycled product produced from ground up newspaper which is treated to prevent mold and resist fire. It is particularly effective because it fills wall cavities completely.

When properly installed, house wrap is an effective moisture barrier. It is engineered to keep liquid water (such as rain) out, while allowing water vapor to escape so walls can dry out if any water finds a way into them.

ACI thanks Bill Asdal & Asdal Builders, BPI, and all of the sponsors, contractors, manufacturers, and hard working folks who made this project possible. Together, we're building a greener, more energy efficient world!

Company	Materials & Efforts
Building Performance Institute	Training certification, master sponsor
Cassidy Pierce	Roofing
Crane Plastics	Siding
DAP	Caulks, Spray Foam
DuPont	Corian countertops
EFI	Electrical/Lighting
Energy Kinetics	System 2000 boiler
Legacy Remodeling	Basement Wall Installation
MaGrann Associates	Building Analysis
NuWool	Insulation
Owens Corning	Basement Wall System
Panasonic	ERV & Air Venting
Qualified Remodeler	Media Partner
SEISCO	On Demand Water Heater
Testo, Inc.	Testing services
Thermastor	Dehumidification
Tim Grindle Insulation (TGI)	Insulation Installation
Trinity Supply	Siding Installation
Viega	Plumbing Piping
ViWinCo	Windows
Whirlpool	Appliances
Zerodraft of PA	Air Sealing installation
Zerodraft	Sealing accessories
